

# Indoor Activities

---

*Indoors, there was plenty to see, IPMS put on a fantastic display of model aircraft. As always there was huge interest in the display of over 100 top class models.*

*Alongside this was Shannon Airport Photo Library, a rare collection of photos dating back to the foundation of the airfield. Thanks to SAA for letting us display this fantastic collection. Also on show and still with us is part of the Pierce Cahill Photo collection. This includes many photographs of Iona Airways, Irelands first airline.*

*Upstairs in the first class section, some passengers relax while others got busy making their own model of the Ferguson Flyer in the workshop.*

*Also on show was the Ferguson Flyer model by Dr Liam Scott of Belfast University and a 1948 Ferguson Tractor built after he became the first man to fly a powered aircraft in Ireland 1910.*

---

*Paul Kennedy from Air Atlanta Aero Engineering demonstrates a composite repair with hi tech mobile bonding machine used for off site aircraft repairs*

*Walter Stanley from UL Aeronautical Engineering Dept demonstrates Aerodynamics using a Wind Tunnel which caught lots of attention from the public.*

*Limerick Radio Club set up their Antennae and equipment to capture signals and track aircraft.*

---

# ACE Halloween Aviation Camp

---

## 26th—29th October

*ACE Camp is back for Halloween Break, ideally suited for ages 8+ . Young Aviators enjoy simulated flight lessons from qualified pilots and learn some of the theories of flight as well as trying their hand at landing our Boeing 737 NG Flight Simulator.*

*Camp runs from Tues 26th to Friday 29th from 10.00am – 1.00pm and costs €110 per child*

*Aviation Art and Craft Camp was popular over the Summer . Kids get to make their own wind-socks roundels, model airplanes and as wind-socks, roundels and models .  
Included 30 min flying to end the days activities!*

*Camp runs from Tues 26th to Friday 29th from \ 1.30pm – 4.30pm and costs €75 per child*

[ACE camp summer visit Air Atlanta Aero Engineering](#)

*The kids were all allowed into the cockpit and were given a guided tour of the aircraft maintenance facility. To follow that we had a visit to ATC centre . Thanks to Air Atlanta and the IAA for their continued support for the education of our future pilots and engineers!*

*We cant always offer trips out, but we try when its possible.*

**Aviation Art and Craft Camp**  
*Serious thought goes into airport design and planning!*

# Visit Santa at his Flight Deck

## 18th and 19th December

*Santa will be seeing visitors at the flight deck of his BAC 1-11 'Aero Grotto' this year !*

*Kids can visit Santa in the cockpit and then take off from Lapland Airport to find Santa's secret airfield and make a landing on the snowy runway, didn't know Santa had a runway? . . . . Adults and older kids can see our visitor centre, and take part in flying challenges too!*

*Special B737 Landings into Lapland for the weekend! More Info on the Weekends Activities next month*
